DETAILED ACTION

1. Claims 7-11 are pending in this application.

2. The claims are written in product-by-process form. See MPEP 2113.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 7-9 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Pricone (4,478,769).
- 5. An embossing tool with non-prismatic metal structures is formed. The outline shape of the element may be triangular, square or hexagonal. Figure 2 illustrates an example wherein the intersection of grooves 31, 34 and 37 create base 41 for each of the tetrahedrons or cube-corner elements 40. See col.4, l.1-48, col.5, l.24-63 and the figures.
- 6. Claims 7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Mentz (US 6,017,657).

Application/Control Number: 10/804,798 Page 3

Art Unit: 1756

7. Figure 4 illustrates an embossing tool having pattern 14 of lands and grooves formed directly on a tool substrate made of a hard material, such as steel. As can be seen in the figure the pattern 14 is non-prismatic and curvilinear. See col.7, I.27-49.

- 8. Claims 7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Ronan (US 6,277,464).
- 9. Embossing tool 33 is a metal die having a plurality of protrusion 32. The protrusions can be of any desired cross-sectional shape, such as tetragonal, round, ovoid, oblong, orthogonal, stelliform or any other desired shape. The protrusion 32 may also change its shape along its length. For example it may be tetragonal at the base and round at the tip. Figures 5A and 5B illustrate tapered pyramidal or conical protrusions. See col.6, I. 48-68, col.8, I. 28-65 and the figures.
- 10. Claims 7-9 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Bonivert (US 6,350,360).
- 11. A three-dimensional multi-level imprint tool having features of varying geometry stacked one on top of another feature used for embossing is formed. A thin layer of copper 24 is formed over resist pattern in order to enable the adherence of thick metal layer 26. The thick layer 26 is then removed from substrate base. See col.5, l.15-47 and figures 3A-3C.

Conclusion

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nicole M Barreca whose telephone number is 571-272-1379. The examiner can normally be reached on Monday-Thursday (9AM-7PM).

Application/Control Number: 10/804,798 Page 4

Art Unit: 1756

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
